

Meade Co. ATC Students Excel at LTI Competition

Members of the electronics technology class at the Meade Co. ATC recently participated at the Louisville Technical Institute's Electronics Fair and came away winners.

Students from Instructor Omer Horsley's class were given the task of building a binary, light sensitive counter (used for high speed counting in digital circuitry) as their competition project.

Pictured above from left: Ben Haukom, third place winner; Debra Grant, first place winner and Chad Ford, second place winner.

Seniors Debra Grant, Chad Ford and Ben Haukom placed first, second and third respectfully and won scholarship money totaling \$5,500. Ben and Chad are both first year students in Mr. Horsley's two-year electronics program and Debra is a second year student.

Other electronics technology students who participated are Darren Mattingly, Derrick Spruill, Devin Darnall, and Levi McIntosh.

"This competition gives our students a chance to show what they have learned in the classroom as well as having an opportunity to earn valuable scholarship money," said Mr. Horsley.
